

Your Environmental Harmonizer

from Sixth Sense Consulting

Congratulations on the purchase of your Environmental Harmonizer! This information will acquaint you with the care of your harmonizer, the warranty and the many unique features. Our contact information is below. Please read this carefully, and then call or email us with any questions or concerns.

How are Sixth Sense Consulting Harmonizers Better than Other Brands?

There are other brands of harmonizers on the market. We have even used some of them. But there is NOTHING out there to compete with our Harmonizers. Here are just some of the reasons our Harmonizers are better:

- We hand-assemble our Harmonizers personally. Having expert geomancers make your Harmonizer by hand guarantees it is packed with proper energy of intent every step of the way during its assembly process. .
- We have the longest warranty on the market for guarantee of functionality.
- Our Harmonizers transform ALL types of noxious energies. Not just EMF. Not just geopathic stress. Most other brands only claim to neutralize EMF and/or geopathic stress of certain kinds.
- We have field tested our models extensively to create a design that works in all types of environments. Every new model is field tested in multiple environments and the design modified for optimum performance before it is available for sale.
- Even though our Harmonizers are custom assembled by us, our prices compare very favorably with the closest competitors' models, which are mass-produced.
- We have a buy 2, get 1 free pricing system that saves you even more money.
- Our Harmonizers are attractive and blend with just about any décor. Plus, they come in sizes that will effectively protect and harmonize any size area unobtrusively.
- We have models to suit any indoor application. We are currently researching outdoor applications.
- Our Harmonizers do not require any power source. Some competitors' brands require electricity, thus creating EMF themselves.
- Some other brands use what we consider questionable designs. For example, how is broadcasting the Schumann resonance going to clear your space? If the earth is constantly putting out that frequency, how is adding a machine that does the same thing an improvement or innovation?
- As expert geomancers with years of experience, we know what noxious energies are out there. We deal with them daily in our work. We are also current on the rapidly changing environmental energies of the planet. Our Harmonizers incorporate all aspects of our expertise to give you a functionality that is the most effective and up-to-date available. We are continually testing and upgrading our design to give you the best results.
- Your feedback matters to us. If you have suggestions, please let us know. The Small Personal model is a result of such feedback.

Use of the Harmonizer Models

Each model of Harmonizer has its own unique properties. Acquaint yourself with the applications for your model, so you can get the most out of your Harmonizer.

Small Personal Harmonizer:

The pocket-sized Small Personal Harmonizer is specially designed to protect the one who carries it in

purse or pocket. Noxious energies abound, and by always having your Small Personal Harmonizer on your person at all times, you can feel much safer when going about your daily routine.

Whether you are shopping at the mall or visiting friends, this unobtrusive model will create a region of harmonized space around you that will enhance your aura, your energetic protection and your sense of well-being. Get into the habit of always carrying this Harmonizer.

If you don't have purse or pocket, an amulet bag around your neck is another way to have the Harmonizer on you at all times. We suggest that if you wish to wear it inside your clothing next to your skin, that you wrap it in a fabric to protect the finish.

Large Personal Harmonizer:

The Large Personal Harmonizer creates a larger zone of harmony. It is ideal for your car, your work cubicle or a motel room. We recommend you always have one of these in the glove box of your car. Take one with you when you travel, as motel rooms are notoriously messed up energetically. Where you work will become more balanced if you have one of these in your desk.

This model creates a larger zone than the Small Personal Harmonizer. Thus, it can be combined quite well with the small model. Always have the Small Harmonizer in your pocket or purse. Have the Large model at work, in your car or with you on travel.

Having more than one Large Personal Harmonizer is probably a good idea for some people. Families definitely need more than one. Each car and each work space will benefit by having one of the Large Personal Harmonizers.

The Large Personal Harmonizer may also be used by contract workers at work sites. Buy the Business Harmonizer for your office, and a Large Personal Harmonizer for the worksite, if you have a physical presence at that site, such as work crews you supervise.

Home Harmonizer:

The residential model of our Harmonizer will keep any size home balanced and harmonious. Place the Harmonizer wherever you wish. It does not have to be visible to work. While the Harmonizer is not intended to take the place of regular space clearings, it will help keep a space clear all by itself. We have observed that this harmonizer will even clear your space of many types of discarnate entities. We recommend you use this model as part of our regular Create Safe Space program.

Business Harmonizer:

Do you own your own business? Work from home? Do contract work? Are you managing a lot of people as the head of a project at work? The Business Harmonizer was designed for your needs.

Place this Harmonizer in your home office, if you work from home. If you have an office or small retail outlet, place the Harmonizer on your desk in your work area there.

If you have a large business, call us for a quote on a Harmonizer for your needs. This model is for small businesses. We create custom models for large businesses.

The Business Harmonizer will enhance business relationships in many ways. Absenteeism, accidents, poor performance and personnel issues are a sign of disharmonious energy, as is financial difficulty. Let our Business Harmonizer work 24/7 to help you reach your business goals.

We recommend you use this in conjunction with regular business space clearings.

FAQs

Does it matter where you place the harmonizer?

It should be located in an appropriate place for the purpose. A Business Harmonizer works best in the business office. The Small Personal Harmonizer should be carried on the person for best results. You may dowse to find the best location. Or you may ask us to dowse for you. But usually just about anywhere in the appropriate space will work.

Do the Harmonizers require maintenance or clearing like crystals do?

Crystals accumulate noxious energies, but our Harmonizers are self-cleaning. They need NO maintenance. That is a big plus.

If I have a home business and a Business Harmonizer in my home office, do I need a Home Harmonizer as well?

No. If you have a Business you run from home, your Business Harmonizer also will act as a Home Harmonizer.

If I have a Small Personal Harmonizer, do I really need a Large one in my car or office or motel room?

Ideally, yes. The Large Harmonizer covers a bigger area or living space. Thus, it is suited for the car, office or motel room. It is not as portable as the Small model, so is best used in a larger space.

Will airport X-rays damage my Harmonizer?

No, actually the X-rays will not harm it in any way. We recommend you put the Large Personal Harmonizer in checked luggage to avoid problems at the security point, though.

Can I get my Harmonizers through airport security?

We can't promise about all airports, but our clients have reported that when a SMALL personal harmonizer is in carry-on luggage, it has passed through security with no problem. The larger Harmonizers do fine in checked luggage.

What will damage the Harmonizer?

We suggest you avoid things that may damage the wood finish: water, harsh chemicals and hard objects. While the surface is not a part of the functionality, it will retain its beauty if you care for it as you would any fine wooden object.

Opening the box, which would be very difficult, since it is sealed shut, voids the warranty, as it will disrupt the design. Do NOT open the box. Do NOT submerge it in water.

If the box gets dirty, wipe it with a soft cloth using a furniture wax or oil. If necessary, a very slightly damp cloth with very mild detergent will remove most types of dirt. Dry carefully afterwards.

Care of Your Harmonizer & Harmonizer Warranty

Your Harmonizer has been designed to need no maintenance. You don't need to move it around for best results. You never need to clear it. It will continue to clear and balance the space for at least 3 years. That's our guarantee. If you feel it is not working, contact us and we will resolve your issues. If necessary, we will replace your Harmonizer free of charge.

While we have a 3 year limited warranty, in reality, we expect these Harmonizers to effectively clear space for as much as 10 years or more.

Your Harmonizer is intended for indoor use. Do NOT use it outdoors, as it may damage the unit. The warranty will be voided in this case.

Do NOT attempt to open the Harmonizer box. It has been sealed for your protection, to protect the functioning of the Harmonizer itself, and to protect our proprietary design. Opening the box voids the warranty.

Background on Harmonizer Development

Back in about 2005, we came up with the idea of a 24/7 space clearing mechanism that would need no maintenance. Actually making such a device proved to be a challenge. There were at least 3 trial designs of Harmonizers that were field tested before the first design went on sale. We used our extensive experience in space clearing and our expertise in intuitive techniques to create the ultimate space clearing tool.

We enlisted the aid of a number of talented, intuitive clients and friends all over the U.S. to test the products, and to give us feedback so we could improve the design. The Harmonizers were years in the making, and we are proud of the results people get with them.

We are continually seeking feedback and upgrading the design, as the energies on earth are constantly changing. We are also researching and designing new models for other applications. Your results matter to us. Contact us at any time to share.

We have been professionally clearing people's space since before the year 2000. We have worked on site in MT, WA and AZ and the U.K. to clear noxious energies, and long distance around the world. We use our vast experience and our expertise as Master Dowzers to help us develop our Harmonizer designs.

Our current models employ a variety of natural materials in a proprietary design to accomplish their purpose. The design transforms noxious energies and has a self-cleaning ability that makes it maintenance-free. All types of detrimental energies are transformed by these models. Manmade, geopathic and cosmic noxious energies are cleared continually and safely. They are even helpful at dealing with discarnate entities, which is not addressed by any other type of device on the market that we know of.
