

Please forward this message to everyone on your email list. The swine flu issue is a hot topic, and it potentially affects the health and freedom of all of us. This message includes lots of links to sources that will inform you and allow you to make your mind up about what is best for your health. Don't let someone make that decision for you and your loved ones. There is too much vested interest behind what you see in the media.

Nigel received this email from a business colleague. We felt it was so well researched that it deserves a broader audience. Thanks to John for doing this.

Hi Nigel

It's John Denton President of MyEbizNow.NET Inc. here with an URGENT update...

Hope you are well.

As you know we normally keep our focus on this relay to business. But due to extraordinary circumstances that we have been informed about, we had to contact you today with some really important information that concerns every member all around the world and we need your help to pass this information on.

We have all heard of the new swine flu right?

Well there is a lot of information for good reason that the governments around the world are not telling you. They are really doing an awesome job right now at running fear campaigns to have everyone in the community running scared about H1N1.

Before you decide to get your shots voluntarily please take your time to weigh up the facts that could ultimately lead to protecting your health rather than just rushing into vaccination because your Government says it's the right thing to do.

Ok so the vaccine is coming but what does this really mean for you?

Of course, everyone has free will to do what they want but before you make your decision, we just want to bring many important facts to your attention before you run out to get your shot.... Take some time to read and watch the links below and you maybe shocked about the real facts of the H1N1 Flu....

This is the stuff the Governments wont tell you....

If you want more info on the affects of what this vaccine for swine flu can do along with the real facts of the swine flu then go to: <http://www.doctorsaredangerous.com/articles/swineflu.htm>

Here is an interview by Dr Mercola talking about the Vaccine: - please disregard any advertising on this video.

<http://products.mercola.com/multivitamin-vital-minerals/?source=nl>

As of August 28th 2009 (update 63) (http://www.who.int/csr/don/2009_08_28/en/index.htmlhttp://www.who.int/csr/don/2009_08_28/en/index.html), there have been 2185 deaths world wide from H1N1. Compared to seasonal flu, this does not constitute a pandemic let alone justify mandatory mass vaccination with a vaccine that will have dangerous side effects and little proof of efficacy.

Approximately 36 thousand Americans die from seasonal flu every year, 200 thousand are hospitalised. Between 250 - 500 thousand people die from seasonal flu world wide, also resulting in three to five million cases of severe illness. <http://www.who.int/mediacentre/factsheets/fs211/en/><http://www.who.int/mediacentre/factsheets/fs211/en/> The world wide 2185 deaths from H1N1 virus, does not constitute a pandemic yet alone grounds to begin mandatory vaccination around the world.

This doesn't make sense to us and it seems there is some higher order or reason to be running this scare campaign around the world. There is also a massive cost to each tax payer along with a huge profit being made by the manufacturer of the vaccine.

While we are on manufacturers, can you believe a company called Medimmune filed a patent on the latest H1N1 flu more than a year before the first case? Yes you heard, a year before the swine flu started!!! Don't believe us then watch this.... <http://www.viddler.com/explore/ufoblogger/videos/51/><http://www.viddler.com/explore/ufoblogger/videos/51/> - H1N1 Swine Flu Virus Patented by Medimmune Back in 2008

Funny that the Australian government cant even come clean on the actual cost yet they have put in an order for 21 million H1N1 vaccinations and there are only 21 Million people in the country!

If that is not starting to look like mandatory vaccination then what is? Why would the Government buy 21 Million Vaccines at a cost they can not even tell the tax payers of Australia about if they didn't have a plan to max vaccinate? You be the judge... <http://www.news.com.au/couriermail/story/0,,26091306-952,00.html> -Federal Health Minister Nicola Roxon says near the end of the article and we quote...

Ms Roxon was unable to put a precise figure on the cost of the vaccine.

"There are some confidentiality issues. We have a private contractual agreement with CSL for the priority provision for this vaccine," she said.

"I have made clear on the record before that it is over \$100 million. It is not appropriate for us to be itemizing the exact cost, given the commercial interests that are also at stake."

Personally we find that very interesting that the government who has gone into contract with CSL can not give the Australian people (who will be consuming the vaccine should they choose to have it) an honest answer of what this vaccine is going to cost the tax payers nor the real facts behind the vaccine.

It is really interesting that CSL the makers of the vaccine have posted a tidy 63% profit also:

of the video you will see a lot more to watch. Feel free to research more at your own free will... Believe what you will from it...

We believe there is a game being played in a big way right now and you need to know about it to assist you with the decisions you make for you and your family and to take action.

If what you have read and watched has you wanting to take action and you live in Australia then Michael Bending of Alliance for Health Freedom Australia has a petition against mandatory swine flu vaccination on his site, he is aiming for 100,000 signatures and has only just posted it so there are less than 1000 so far.

He needs as many health-wise people to sign this petition and send the message to Rudd and Roxson that mandatory vaccinations are TOTALLY UNACCEPTABLE.

The link is:

<http://www.healthpetitions.com.au/mandatory-swine-flu-vaccination/petition/ref/1458>

Read the letter on the right hand side along with review the links in the letter. You can also send a copy of the letter to your local member if you live in Australia.

If you are not from Australia, research this more in your local country and make a stand now!

Please take action with your research today - time is ticking fast!

Please take it upon yourself to research the internet in your own country. Please google any of the following; "H1N1 Vaccination" "H1N1 vaccine" "H1N1" "H1N1 Update" "H1N1 Forced Vaccinations" to get you started.

Please pass this message on to as many as possible before it is too late.

Thank you for reading and researching this very important topic.

Love and blessings,

John Denton
